Homework

1. Do spell check.
2. Submit your homework using a single file with all the information.
3. Do NOT submit a single PDF file only. Submit a Google Doc, which is editable by me.
4. Use page-break for the next problem. Start a new problem in a new page.
5. Do not directly copy and paste your codes on Google Doc. Use screen capture and add images.
6. If you use Excel or Google Spread Sheet for data analysis, copy the tables to your Google Doc.

Cluster Use

1. We will be back to use **fractal for PBS job submission**.
2. Do NOT login c18 or compute-1-18 and also other compute nodes.
3. Do NOT modify your `~/.bashrc` and `~/.bash_profile` (even if you are familiar with them) until I cover how-to.
4. Do NOT modify any files under `~/.ssh` for any purpose until I cover ssh keys.
